

EAST SUSSEX churchyard sites with younger yews

ALFRISTON St Andrew TQ52160300 12/10/2011 Tim Hills

A vague reference to there being an old yew here. It is possible that in old pictures an ancient oak has been mistaken for a yew.

DITCHLING St Margaret TQ325153 28/3/2004 Tim Hills

Young only here

PLUMPTON St Michael TQ357135 6/7/1999 Tim Hills

A yew with 5 stems radiating outwards from ground level. Measurement would be meaningless.

PLUMPTON GREEN All Saints TQ36381688 6/7/1999

Built c1893 there was no yew of note here.

SEDLSCOMBE St John the Baptist TQ776188 13/10/2011 Tim Hills

A web site describes the churchyard 'full of yew trees'. None are of any note.

STREAT Parish Church TQ351152 6/7/1999 Tim Hills

Many youthful stems from a 1' high bole.

WARTLING St Mary Magdalene TQ658092 11/10/2011 Tim Hills

Yew here may not be churchyard yew, but closer to the Lamb Inn.

WITHYHAM St Michael and All Angels TQ49333558 2008 Steve Young

Churchyard yew. Also noted on slope beside footpath between church and B2110 - it might be contemporaneous with two largest churchyard yews of similar size. Location of this one outside churchyard was 422cm at 80cm.
