

OSMASTON

St Martin

Diocese of Derby

SK19954401

2005: The largest yew here is male and grows close to the road in the SSW corner of the churchyard. Proximity to the road has meant constant cutting back of the tree, creating a jumble of growth. It appears solid but the hollow interior is more obvious in the side facing the road, with crumbling heartwood and other signs of decay.

Girth: 17' 7" at 1'.
