

The female yew grows SW of the church, only a few metres from the tower. This has led to the removal of most of the branches below a height of about 10'.

The solid yew had a girth of 12' 6½" at 2' and 12' 4" at 4'.

A 2<sup>nd</sup> yew grows at the churchyard's north perimeter. It was either planted in the early 1990s as part of the Go for God programme, or is one of the many yews planted in churchyards to celebrate the Millennium.
