

STOCKWOOD Dorset

Disused ancient church. Close to a stream but on raised ground.

One yew. 146cm stem diameter / 459cm girth @ 0.7m where thick Ivy has been cut.

~11m ht & 8m crown radial spread

Quadrafurcated secondary stems from ~ 1m ht.

Iron wheel/ pulley stuck in Union.

Good structural condition but foliage density denuded by ~ 15%. Probably due to dry soil. Surface roots showing - needs mulching.

Location - ///duplicate.football.limit
