

1998: Here are three yews growing close to each other south of the church. All are female, hollow and healthy. The largest had a girth of about 16'.

Next in girth was recorded in 1983 by Reg Wheeler as 414cm at 100cm (13' 7"). I gave this tree an approximate girth of 13'.

The smallest was recorded in 1983 by Reg Wheeler as 326cm at 90cm. In 1998 I gave it an approximate girth of 12'.
