

17th August 2007

A small and simple early 15th century church.

The female yew grows on the north side, by the north porch. A solid looking, fine healthy and tall tree with thick branches from 10'/12' and upwards. Girth of 15' 0" at 2' recorded.

In June 2014 Peter Norton recorded girths of 15' 8" at 1' , 15' 3" at 2' and 15' 2" at 3'.

In November 2016 I recorded 15' 4½" at 2' and 15' 5" at 4'.
