NEATH / PORT TALBOT - churchyard sites with younger yews

BLAENGWRACH St Mary SN87030558 Mark Turner - January 2022

There are 8 yews in the churchyard all of which appear to have been planted at a similar time. Three are multi-stem yews, probably a group planting. The average girth is just under 2 metres, while the yew close to the entrance is 2.4m. They are a mixture of male and female trees.
